

#Description: How to write goof reports

## GENERAL INFO

### Title

<ROOT CAUSE> + <IMPACT>

### Severity

LikelyHood x Impact

### Relevant Links

links to vuln code in repo

## BODY

### Summary

Brief. To The Point.

### Details

```
CODE {  
  code  
@> vuln line  
  code  
}
```

code snippet with finding lines marked exact details.

### POC

Steps to exploit. better have **coded test/exploit** to prove validity of finding

### Impact

Exactly how bad it is.

### Recommendations

Provide how it can be mitigated

```
- vuln removed  
+ secure code added
```
